

CDFX Trading Long Term Portfolio

Portfolio goal

The goal of our portfolio is to make a steady, relatively low risk return by diversifying over different asset classes. The main focus is on following the MSCI ACWI NR USD Index. This index follows the best companies that are established globally. This way we have maximum diversification for low costs. The other assets in our portfolio have the goal to hedge against the dollar as well as adding in some risk and more potential gain.

Risk allocation

Low risk AW Index:	80%
Higher risk growth:	20%

Returns

Q1 2021	6.85%
Q2 2021	4.11%
